REYNOLDS
DEPT. OF AGRICULTURE
CIRCULAR NO. 12.

United States Department of Agriculture,

SECTION OF FOREIGN MARKETS.

[Under the immediate supervision of the Secretary of Agriculture.]

SOURCES OF THE PRINCIPAL AGRICULTURAL IMPORTS OF THE UNITED STATES DURING THE FIVE YEARS ENDED JUNE 30, 1896.

The following tables, showing the principal sources from which have come the more important of the agricultural products imported into the United States during the last five years, were prepared in accordance with instructions issued by the Secretary of Agriculture under date of October 19, 1896. Similar tables, showing the countries to which our leading agricultural exports were shipped during the same period, have also been compiled, and will be made the subject-matter of another circular to be issued in the near future. The figures used in each case were taken from the official commerce reports published by the Bureau of Statistics of the Treasury Department.

The tables in the present circular are arranged in two series, the first relating to the values¹ and the second to the quantities of the articles imported. In the case of several articles, however, the values only are stated, no returns having been made as to quantity. To facilitate a comparison of the figures in the two sets of tables, cross references are given from each statement of values to the corresponding statement of quantities, and vice versa. In addition to the values and quantities imported annually from the leading countries of supply in the five years under consideration, the tables exhibit for each article the average importations per annum during the five-year period, and also the per cent received from each country.

An index to the articles included in the circular is printed on page 24.

¹The values of articles imported into the United States since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty, and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities, at the time of exportation to the United States, in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought and sold for exportation to the United States, or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." From the foregoing it will be seen that the values returned for imports into the United States do not include the cost of freight on the goods from the foreign port whence shipped.

Values of important agricultural products imported into the United States from the leading countries of supply during the five years ended June 30, 1896.
